

# HAARSLEV™

Processing Technology

## TIRED OF LEAKAGES?

### INTRODUCING FLEXICON™ HAARSLEV'S NEW IMPROVED SEALING SOLUTION

#### APPLICABLE FOR:

- Poultry Rendering
- Meat Rendering
- Fish Processing
- Sludge Processing
- Waste Food Depacking

SCAN

OR LINK

#### BENEFITS

- Limiting the leakage from the stuffing box house with up to 99%\*
- Improves the lifetime of the braided packing up to 10 times or more\*
- The overall service time is drastically lowered compared with fixed stuffing box houses
- Lower total cost of ownership
- Significantly reduces water usage needed for cleaning

\* When the packing glands bolts are tightened when liquid spillage occurs

“

JONAS LØTH, FOREMAN, FF SKAGEN  
“WE DO NOT HAVE THE SAME CHALLENGES WITH RETIGHTENING PACKING AND REPLACING PACKING CORDS ... THIS IS SOMETHING WE WOULD RECOMMEND TO OTHERS”

Pat. pending Flexicon™ is a flexible stuffing box shaft sealing for rotating parts, by allowing the stuffing box house to move according to the radial and vertical movement of the shaft.

The sealing solution can be used for:

- Screw conveyors
- Bins
- Buffers
- Rotating Strainers
- And other machines as well as non-Haarslev equipment

Flexicon™ can be used in generally everything that has a shaft sealing and is especially suitable in the section before the dryer. Flexicon™ is designed for wearsleeves with diameters from Ø70 to Ø170 mm.
