FROZEN BLOCK CRUSHER

“

CRUSHES LARGE BLOCKS OF FROZEN BONE-FREE MEAT AND POULTRY BY-PRODUCTS, OFFCUTS AND TRIMMINGS.

The Haarslev Frozen Block Crusher is ideal for effectively and reliably crushing blocks of frozen meat and poultry by-products, offcuts and trimmings of all kinds. Such blocks often come from vertical plate freezers, and the material is usually destined for use in pet food.

APPLICABLE FOR:

- Wherever blocks of frozen meat and poultry by-products enter a processing plant
- Upstream from metal detectors, batching silos, etc.
- Preliminary processing before use of grinding equipment

These large crushers are available in two configurations. The single-shaft unit can crush up to 15 tons/hour of individual frozen blocks, while the double-shaft unit is best for crushing whole pallets of frozen blocks, with an output of 50 tons/hour or more.

Both block crusher types feature knives specially shaped to grip the frozen input material, for effective crushing. This ensures outputs consisting of fist-sized pieces – ideal for efficient grinding further along in your process.

Haarslev Frozen Block Crushers can be combined with a wide range of hoppers, mounting frames, feed systems, discharge systems and other ancillary equipment.

BENEFITS

- Rugged and reliable to ensure uninterrupted operation
- Effective crushing of large quantities of frozen material
- Easy to keep clean and maintain

**BLOCKS OF FROZEN BONE-FREE
MEAT AND POULTRY BY-PRODUCTS,
OFFCUTS AND TRIMMINGS**
